

# Abstract program overview

## Oral Presentation

Each speaker has 6min presentation and 2min Q&A

Date	Start	No.	Session	Presenter	Country	Title
Jun 11	10:50	OP-1-01	Gastrointestinal	Wakako Ichida	Japan	Two cases of biliary rhabdomyosarcoma in children
	11:00	OP-1-02	Gastrointestinal	Peggy Tang	Hong Kong	Pneumatic reduction of paediatric intussusception in Hong Kong: clinical experience and factors affecting outcome
	11:10	OP-1-03	Gastrointestinal	Hiroyuki Koga	Japan	Laparoscopic portoenterostomy for a patient with prenatally detected cystic biliary atresia
	11:20	OP-1-04	Genitourinary	Manabu Okawada	Japan	Treatment of urinary incontinence due to ectopic ureter associated with dysplastic kidney
	11:30	OP-1-05	Oncology and Radiation Oncology	Can Lai	China	Evaluation of preoperation TACE in children with advanced Wilm's tumor
Jun 11	14:10	OP-2-01	Neuro, Head and Neck	Billy MH Lai	Hong Kong	Utility of Diffusion tractography, MR spectroscopy and MR perfusion in assessing the cerebral white matter and cerebral perfusion in the paediatric brain
	14:20	OP-2-02	Neuro, Head and Neck	PhuaHwee Tang	Singapore	MRI brain changes in athletes post competition
	14:30	OP-2-03	Neuro, Head and Neck	Jacqueline Austine U. Uy	Philippines	Computed Tomography Measurements of the Cochlea in Children Presenting with Hearing Loss
	14:40	OP-2-04	Safety, Radiation, IT	Odina R. Gomez	Philippines	Incidence of delayed adverse contrast reactions in patients who underwent MRI in St. Luke's Medical Center
	14:50	OP-2-05	Safety, Radiation, IT	Kushaljit S Sodhi	India	Application of Justification and Optimization principle of ALARA in CT examination in a developing country: Prospective analysis of 1302 CT requisition forms
Jun 12	14:10	OP-3-01	Oncology and Radiation Oncology	Akihiro Yoneda	Japan	Revised Evaluation of Image Defined Risk Factors for Localized Neuroblastoma According to the New Guideline
	14:20	OP-3-02	Chest, Breast	Regina Castillo Nava	Philippines	Correlation of the chest radiographic findings with the platelet count and hematocrit levels in pediatric patients with dengue infection
	14:30	OP-3-03	Chest, Breast	Ryo Sueyoshi	Japan	Impact of three-dimensional computerized tomographic scanning on preoperative planning for thoracoscopic pulmonary lobectomy in congenital pulmonary airway malformation.
	14:40	OP-3-04	Cardiovascular	Ming Zhu	China	Evaluation of congenital non-Obstructive aortic arch malformation from fetus to children
	14:50	OP-3-05	Chest, Breast	Yumin Zhong	China	Assessment of Pediatric Tracheobronchial Anomalies using Three-dimensional Turbo Field Echo Magnetic Resonance Imaging Sequence

## Poster with Short Oral Presentation

Each speaker has 3min presentation and 2min Q&A

Date	Start	No.	Session	Presenter	Country	Title
Jun 12	18:00	PP-1-01	Neuro, Head and Neck	PhuaHwee Tang	Singapore	Essential sequences for MRI spine for the diagnosis of drop metastases
	18:05	PP-1-02	Neuro, Head and Neck	Shen Jin	China	The role of contrast enhanced MR imaging in young infants with Sturge-Weber syndrome
	18:10	PP-1-03	Nuclear Medicine	Ikuko Mochida	Japan	Initial experience of the dopamine transporter SPECT in three pediatric patients with brain iron deposition
	18:15	PP-1-04	fetal imaging	Yusuke Kawanaka	Japan	Fetal MR imaging of normal thyroid gland: Detectability, signal intensity, shape and size.
	18:20	PP-1-05	Musculoskeletal	Takashi Kawanami	Japan	A case of unilateral laminolysis of L5 without contralateral spondylolysis
	18:25	PP-1-06	Musculoskeletal	Takashi Kawanami	Japan	A CASE OF GLENOID SECONDARY OSSIFICATION CENTER SIMULATING AN AVULSION FRACTURE ON CT

# Abstract program overview

Date	Start	No.	Session	Presenter	Country	Title
Jun 12	18:30	PP-1-07	Oncology and Radiation Oncology	Wee Kyoung Kim	Korea	Imaging findings of Castleman disease in children
	18:00	PP-2-01	fetal imaging	Kentaro Okamoto	Japan	How far can fetal magnetic resonance imaging detect the findings of body stalk anomaly ?
	18:05	PP-2-02	Safety, Radiation, IT	Ruth Quiambao Concepcion	Philippines	Incidence of contrast media extravasation in patients who underwent CT Scan in St. Luke's Medical Center
	18:10	PP-2-03	Safety, Radiation, IT	Michael P. D'Alessandro	USA	Using Twitter To Perform Continuous Pediatric Radiology Education
	18:15	PP-2-04	Chest, Breast	Kazuto Suda	Japan	Thorascopic resection of a very rare extra-lobar pulmonary sequestration in a 2-year-old boy
	18:20	PP-2-05	Chest, Breast	Tsubasa Aiyoshi	Japan	A Rare Case of Pulmonary Interstitial Emphysema due to RSV Infection Requiring a Differential Diagnosis from Congenital Cystic Lung Disease
	18:25	PP-2-06	Cardiovascular	Ming Zhu	China	Evaluation of congenital superior vena cava anomalies from fetus to children
	18:30	PP-2-07	Chest, Breast	Mei Bai	China	The Feasibility of Low Kilovoltage Protocol for Pediatric Chest X-ray in East China: a Comparison with European Standard Protocol for Pediatric Population at Digital Radiography
	18:00	PP-3-01	Gastrointestinal	Yasuharu Ohno	Japan	Acute appendicitis associated with torsion of vermiform appendix: Report of a case
	18:05	PP-3-02	Gastrointestinal	Emiri Kaji	Japan	Ultrasonography is useful for the diagnosis of pediatric Crohn's disease.
	18:10	PP-3-03	Gastrointestinal	Choon-Sik Yoon	Korea	Poor Outcome of Presumed Acute Compartment Syndrome in a Child: A Case Review
	18:15	PP-3-04	Gastrointestinal	Akio Kubota	Japan	Can plain abdominal X-ray predict focal intestinal perforation?
	18:20	PP-3-05	Gastrointestinal	Hiroki Nakamura	Japan	Bile lake at the porta hepatis in a case after laparoscopic portoenterostomy for biliary atresia
	18:25	PP-3-06	Gastrointestinal	Manabu Okawada	Japan	Laparoscopic repair of intrathoracic stomach complicating giant hiatus hernia : A review of 6 cases.
	18:30	PP-3-07	Gastrointestinal	Wan-liang Guo	China	Risk Factors for Failure Air Enema Reduction for Intussusception in Infants under Four Months Old
	18:35	PP-3-08	Gastrointestinal	Mao Sheng	China	Imaging findings in pediatric patients with pancreaticobiliary Maljunction
	18:00	PP-4-01	Genitourinary	So-Young Yoo	Korea	Ultrasonographic diagnosis of ovarian torsion in neonates
	18:05	PP-4-02	Genitourinary	Mei Bai	China	Megacystis-Microcolon-Intestinal Hypoperistalsis Syndrome (MMIHS): Report of Two Cases with a Delayed Clinical Presentation
	18:10	PP-4-03	Genitourinary	Billy MH Lai	Hong Kong	Rare case of Obstructive Renal Dysplasia associated with Mayer-Rokitansky-Kuster-Hauser syndrome
	18:15	PP-4-04	Genitourinary	Nana Nakazawa-Tanaka	Japan	Idiopathic testicular infarction in a neonate: Imaging and histopathological findings
	18:20	PP-4-05	Gastrointestinal	Zhongwei Qiao	China	Congenital Extrahepatic Portosystemic Shunts in Children with Gastrointestinal
18:25	PP-4-06	Musculoskeletal	Zhongwei Qiao	China	Computer Tomography Supplement to Chest Radiography in the Evaluation of Rib Lesions Involved by Langerhans Cell Histiocytosis in Children	
18:30	PP-4-07	Chest, Breast	Zhongwei Qiao	China	CT imaging in leukemia children with fungal infection	

# Abstract program overview

## Poster in English

No.	Session	First Author	Country	Title
PE-01	Neuro, Head and Neck	Jennifer Ha	Australia	Radiologic and Audiologic Findings in the Temporal Bone of CHARGE syndrome
PE-02	Neuro, Head and Neck	Yusuke Sugioka	Japan	Comparison between fetal and postnatal imaging in the detection of cerebral abnormalities of congenital cytomegalovirus infection
PE-03	Neuro, Head and Neck	Shigetaka Suzuki	Japan	Two cases of childhood acute encephalopathy who became the different outcome
PE-04	Neuro, Head and Neck	Noh Hyuck Park	Korea	Cercical neurofibromas mimicking lymphadenopathies in a patient with neurofibromatosis (NF) type 1, a case report:
PE-05	Neuro, Head and Neck	Aileen Co Lam	Philippines	A quick glance into Leigh's Disease
PE-06	Neuro, Head and Neck	Yuta Fujii	Japan	Brain imaging analysis in Mobius syndrome
PE-07	Neuro, Head and Neck	Clement Yong	Singapore	From "Batwings" to "Butterflies": Abnormal Shape and Deformation of the fourth ventricle.
PE-08	Neuro, Head and Neck	Tomohiro Takeda	Japan	A case of PHASE(S) syndrome with markedly twisted aortic arch
PE-09	Neuro, Head and Neck	Hyun-Hae Cho	Korea	Changes in brain MR imaging of preterm infants after introduction of MR-compatible incubator coil system: a 5-year experience at a single institution.
PE-10	Neuro, Head and Neck	Yuka Morita	Japan	Comparison of cervical US and CT findings between Kawasaki disease and cervical lymphadenitis
PE-11	Neuro, Head and Neck	Hidekazu Aoki	Japan	The correlations between lumbosacral skin lesion and the prevalence or severity of closed spinal dysraphism in asymptomatic children
PE-12	Others	Kazutoshi Fujita	Japan	A case of premature chromatid separation/mosaic variegated aneuploidy syndrome
PE-13	Neuro, Head and Neck	Xiaofan Zhang	China	Application of susceptibility-weighted imaging in the diagnosis and prognosis evaluation of hypoxic-ischemic brain damage in premature infants
PE-14	Neuro, Head and Neck	Zhongwei Qiao	China	Neonatal Bacterial Meningitis and Outcome at Discharge: MRI-based Score Analysis
PE-15	Neuro, Head and Neck	Fang-li Li	China	Alterations of resting-state default mode and salience network activity in overweight children after 2-mouth intervention
PE-16	Chest, Breast	Tatsuya Nishii	Japan	Preliminary experience of spectral shaping by tin filtration and high-pitch double spiral scanning for pediatric chest computed tomography
PE-17	Chest, Breast	Motoo Nakagawa	Japan	A case of difficult endotracheal intubation due to lingual tonsil hypertrophy.
PE-18	Cardiovascular	Kosuke Nishiguchi	Japan	Anomalous Unilateral Single Pulmonary Vein: A case report
PE-19	Cardiovascular	Xiaofan Zhang	China	Application of prospective ECG-gated 128-slice spiral CT angiography in children with complex congenital heart disease and airway abnormality
PE-20	Cardiovascular	Yin Yee Kwong	Hong Kong	Evaluation of congenital mitral-aortic intervalvular fibrosa aneurysm: Role of MDCT in congenital heart disease
PE-21	fetal imaging	Preeyacha - Pacharn	Thailand	Gastric duplication cyst : Detection with prenatal MRI compare with post natal findings
PE-22				
PE-23	Gastrointestinal	Takahiro Hosokawa	Japan	Three paediatric cases of portal venous gas: detecting by only sonography, not by CT
PE-24	Gastrointestinal	Azian Abd Aziz	Malaysia	A Colo-colic Intussusception Caused by a Submucosal lipoma In a Child with Worm Infestation of the Intestinal Tract ? A Case Report
PE-25	Gastrointestinal	Yoshimi Fujii	Japan	Intestinal lymphangiectasis in Noonan syndrome: CT and MRI findings
PE-26	Gastrointestinal	Hyun Jung Koo	Korea	Pediatric Diaphragm: Sonographic Depiction in Newborn and Young Infants
PE-27	Gastrointestinal	Yin Yee Kwong	Hong Kong	Persistent hypersplenism after liver transplant in paediatric patients: the role of partial splenic embolization
PE-28	Gastrointestinal	Chihiro Tani	Japan	Clinical importance of portal vein imaging in neonates detected hypergalactosemia by mass screening
PE-29	Gastrointestinal	Ken Saida	Japan	Pancreatic desmoid tumor in a patient with hemihypertrophy
PE-30	Gastrointestinal	Koichiro Sugimoto	Japan	Pancreatoblastoma: A Case Report and Review of the Literature
PE-31	Gastrointestinal	Yurida Binta Meutia	Indonesia	RADIOLOGIC IMAGING OF NECROTIZING ENTEROCOLITIS WITH ABDOMINAL PLAIN PHOTOS IN ASPHYXIA NEONATORUM AMONG SEVERAL GESTIONAL AGE

# Abstract program overview

No.	Session	First Author	Country	Title
PE-32	Gastrointestinal	Mutsuko Kondo	Japan	A rare case of splenopancreatic fusion with acute pancreatitis in trisomy 13
PE-33	Gastrointestinal	Jeevesh Kapur	Singapore	Imaging of Paediatric Liver Transplant Complications
PE-34	Others	Jae-Yeon Hwang	Korea	Transperineal ultrasonography (TPUS) for evaluation of the perianal Crohn disease
PE-35				
PE-36				
PE-37	Genitourinary	Mioko Saito	Japan	Isolated fallopian tube torsion diagnosed on preoperative magnetic resonance imaging
PE-38	Genitourinary	Sae Ishimaru	Japan	An infant with malignant rhabdoid tumors simultaneously involving kidney and CNS
PE-39	Musculoskeletal	Aileen Co Lam	Philippines	Macrodystrophia Lipomatosa: Little Big Foot
PE-40	Musculoskeletal	Atsuhiko Handa	Japan	MR findings in scurvy: key findings for the differential diagnosis
PE-41	Musculoskeletal	Noh Hyuck Park	Korea	Atypical finding of neurofibroma of foot in a patient with neurofibromatosis type 1 : a case report
PE-42	Musculoskeletal	Farah Hendara Ningrum	Indonesia	PEDIATRIC EXTRA PULMONARY TUBERCULOSIS: A PICTORIAL REVIEW OF IMAGING FINDINGS
PE-43	Musculoskeletal	Yoshimichi Yamaguchi	Japan	Abuse or not? ; Two fracture cases of young children
PE-44	Nuclear Medicine	Dilip K Sankhla	Oman	THE ROLE OF THYROID SCINTIGRAPHY WITH TECHNETIUM 99M PERTECHNETATE IN DEFINING THE SPECTRUM OF THYROID DISORDERS IN YOUNG OMANIS
PE-45	Safety, Radiation, IT	Ka Chi Chan	Hong Kong	Incorporation of New Information Technology to Facilitate Running of Multidisciplinary Team Meetings in Paediatric Oncology ? Experience in Prince of Wales Hospital, Hong Kong
PE-46		Iqbal Dogar	Pakistan	Diagnostic accuracy of grey scale ultrasound and colour Doppler in diagnosis of infantile hypertrophic pyloric stenosis
PE-47		Utami Purbasari	Indonesia	MR Imaging of Cystic Brain Tumor in Children: A Case Report

## Poster in Japanese

No.	Session	First Author	Country	Title
PJ-01	Neuro, Head and Neck	Sonoko Kubota	Japan	A 9-year-old girl with anti-NMDAR encephalitis and ovarian tumor
PJ-02	Neuro, Head and Neck	Rieko Furukawa	Japan	A case of delayed traumatic optic neuropathy following trivial trauma
PJ-03	Neuro, Head and Neck	Yuta Yazaki	Japan	Cervical Schwannoma in childhood : a case report
PJ-04	Neuro, Head and Neck	Reiko Ideguchi	Japan	A case of Hirayama disease
PJ-05	Neuro, Head and Neck	Takako Kotake	Japan	A case of intrasellar pilocytic astrocytoma
PJ-06	Chest, Breast	Jun Shindo	Japan	Appropriate depth of oral tracheal tube placement in Japanese neonates
PJ-07	Gastrointestinal	Yasuyuki Mitani	Japan	A case of colonic atresia showing the pathognomonic X-ray images
PJ-08	Gastrointestinal	Noriyoshi Nakayama	Japan	A Case of Primary Small Bowel Volvulus Without Malrotation
PJ-09	Gastrointestinal	Masataka Takahashi	Japan	A case of blunt liver injury followed by portal venous reperfusion after portal venous obstruction
PJ-10	Musculoskeletal	Maki Kiyonaga	Japan	A case of generalized lymphangiomatosis.
PJ-11	Interventional Radiology	Takanori Oyama	Japan	A case of asymptomatic congenital intrahepatic portohepatic shunt managed by interventional radiology
PJ-12	Interventional Radiology	Takahiro Shimizu	Japan	Hybrid surgery for an adult case with congenital porto-inferior caval shunt presenting severe pulmonary hypertension
PJ-13	Oncology and Radiation Oncology	Ken Saida	Japan	Two Cases of Antiphospholipid syndrome: thrombosis and bleeding
